DETAILED ACTION

1. Applicant has amended claim 9 and canceled claims 1-8 in the amendment filed on 4/14/2009.

Claims 9-16 are pending in this Office Action.

Response to Arguments

2. Applicant's arguments with respect to claims 9-16 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 9-16 are rejected under 35 U.S.C. 101 because claims 9-16 contain no hardware. Thus, the claims 9-16 lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material *per se*.

Allowable Subject Matter

5. Claims 9 -16 are allowed if claims 9-16 get over 101 rejection.

The prior art of record, alone or in combination, does not teach or fairly suggest the combination of steps as recited in independent claim 9, wherein “a central data store for entering and storing object names of automation objects, as directory entries in a directory, wherein each object name includes, first information data as a reference to the automation object, second information data as a description of technological functionality of the automation object, and third information data as a description of an interface of the automation object, wherein the automation object, when in the directory, is viewable by at least one of another user and a tool, and wherein the object name of the automation object is usable to request a reference to the automation object to be worked on by a plurality of users in parallel to create the automation solution in automation technology”.
